UNIFY ME

Unify ME™ Virtual Meeting Room Service

AVI-SPL's Unify ME Virtual Meeting Room (VMR) is our cloud-based conferencing service that unifies real-time conferencing tools – voice, video and web - into a single solution, allowing your users to connect anytime, anywhere, using any device.

The Value of Unify ME VMR

- Connect standards-based and software-based clients into one call
- No reservation needed – easy as making an audio call
- It's your personal conference room without walls – available 24/7/365
- Enterprise-grade security and quality
- Interoperable with H.323, SIP, Skype for Business /Microsoft Lync, WebRTC, and audio
- Cloud recording of your VMR calls

Connect From Any Device

Whether in the office or working remotely, join meetings anytime, anywhere, from any device.

Flexible Pricing Plans

- **Per License:** Pay only for the number of licenses you need, enabling everyone in your organization. Choose from our Named User plan for individuals or Shared VMR plans for groups. Each license receives one VMR that can host up to 25 or 65 participants.
- **Per Port:** Purchase only the capacity you need, quickly adding more as you grow. With our port model, you can provision an unlimited number of VMRs to support your users.

Simple Scheduling

- Quickly schedule a meeting with the Unify ME Outlook Add-In or import Shared VMRs into Microsoft Exchange to schedule room resources.

AVI SPL

UNIFY ME

Easy Content Sharing

- Share and view data wirelessly to enable real-time, in-meeting collaboration
- Compatible with H.239, BFCP, RDP and WebRTC content sharing

Global Platform

- With points of presence in North America, Europe and Australia, you can use Unify ME VMR to join locally and meet globally. Unify ME's ground-breaking distributed architecture allows conferences to span several small units of computing instead of a traditional monolithic platform. The result is significant WAN bandwidth savings in conferences that span locations while maintaining a consistent user experience.

Flexible Deployment

- **As-a-Service Cloud:** No need to acquire or deploy infrastructure
- **Hosted Private Cloud:** All resources are are dedicated and customized exclusively for your organization
- **On-Premises:** AVI-SPL deploys the infrastructure at your site
- **Hybrid:** Add cloud resources to your on-premises investment

Key Features

Cost effective: add users as need increases

Reduce bandwidth bottlenecks

Custom graphics for landing page, portal and WebRTC
Create a custom URL for your portal

Connect Skype® for Business to Everything

- Unify ME VMR allows Skype for Business users to meet over any platform -- traditional video conferencing and web browsers. Everyone enjoys wideband audio, high-definition video, and cross-platform presentation sharing.

- Skype for Business users see standards-based participants in the meeting as if the were other Skype® users.

- For those invested in legacy video conferencing and Skype for Business, Unify ME VMR leads to intuitive usage, better adoption rates, better ROI.
